About Us

## Welcome to 1st Class Home Improvements website

Our commitment is to providing high quality, reasonably priced home improvement services. We're not typical contractors! Our employees are professional, efficient and courteous. The owner works on-site and is available should you have any questions.

The process begins with a visit to your home to assess the project. We'll provide you with a free written estimate of the proposed work within 48 hours. Once you agree to the quoted estimate for work, we will contact you to schedule a start date for your project. Unlike most other contractors, we don't take a deposit until we **begin** the project.

We will contact you the week before your project is scheduled to begin. Our workers will arrive at your home on time, on the scheduled start date. At the end of each day we clean up the work area. We treat your home as if it were our own. Our attention to your details is impeccable! For a small fee, we also provide a service to haul-away and dispose of any of your old building materials.

All of the above is just part of what we consider business as usual at 1st Class Home Improvements. Click the links to the left and browse the samples of our work. Feel free to email or call our owner Mark if you think we could help you to improve your home.
